Session Hijacking
Lab Assignment (Module 11)
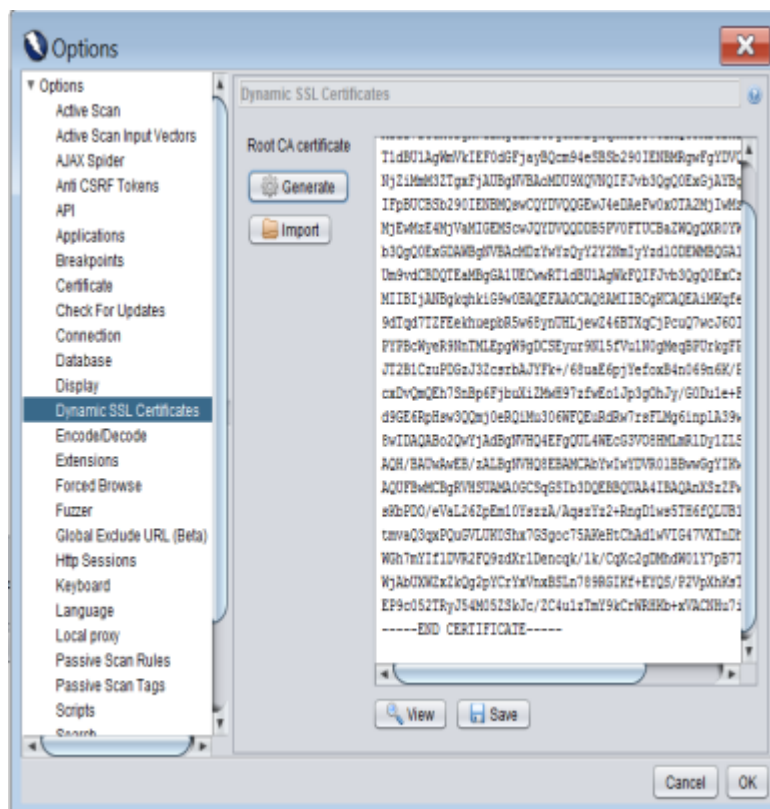

Name: Sachin Saj
**Roll No:** CB.EN.P2CEN18012
Date of Submission: 22/06/2019
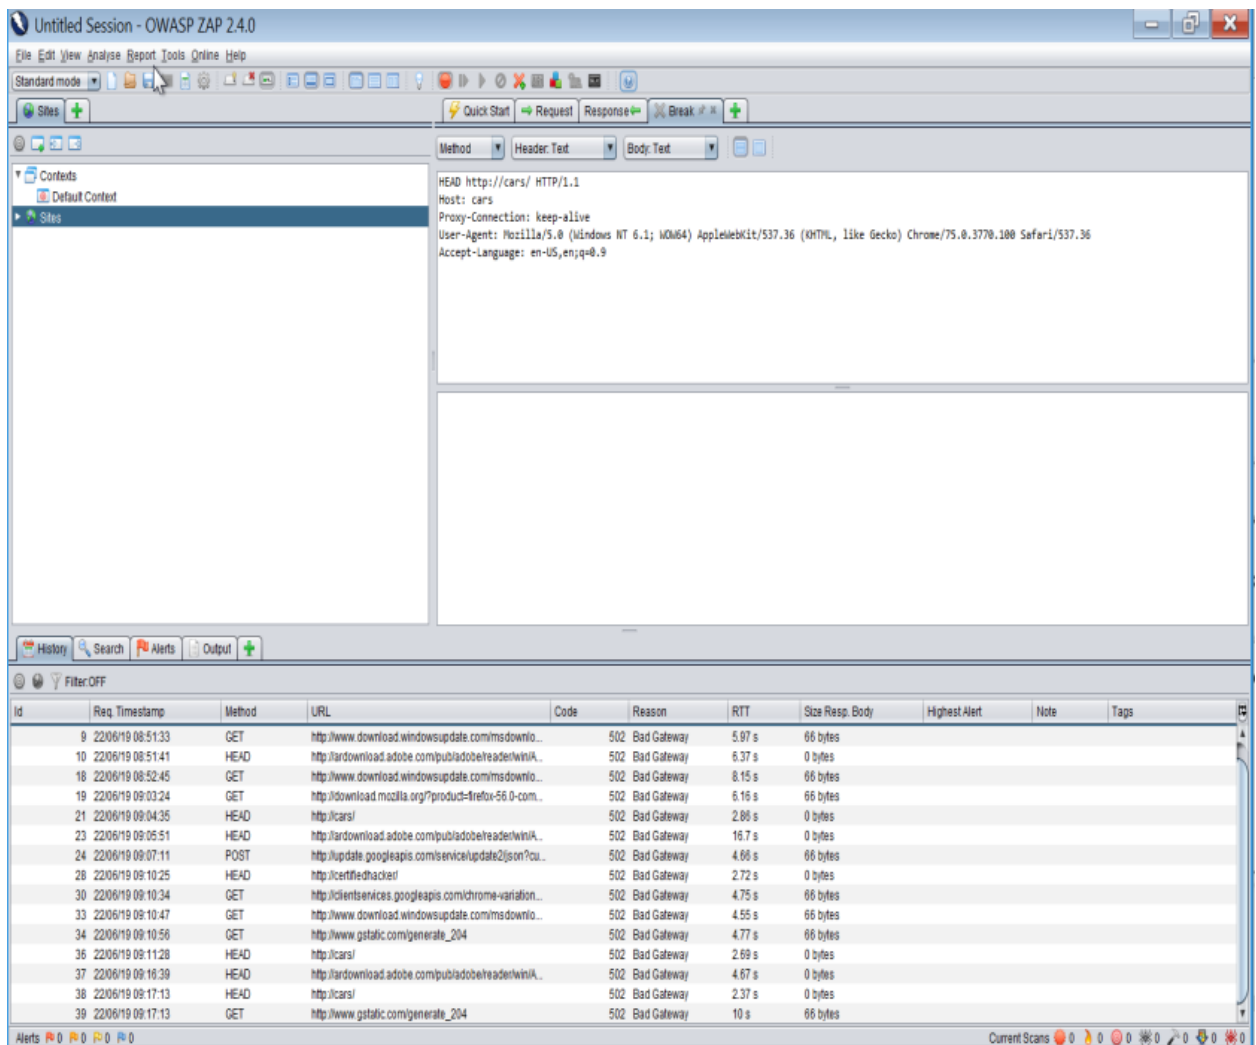

Session Hijacking Using Zed Attack Proxy (ZAP)

1. First Generate Dynamic SSL certificates, thus creating paros proxy server which intercept requests.
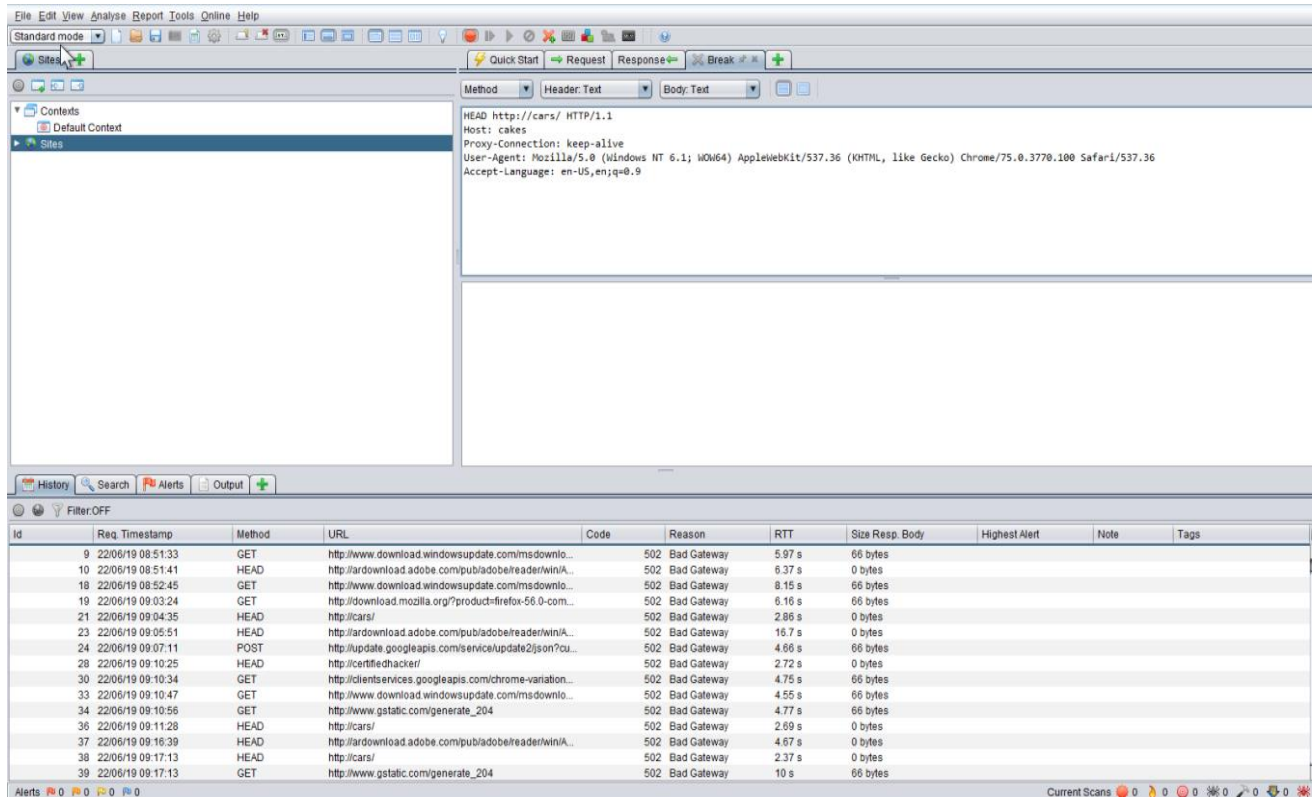

2. Now, change the proxy server setting.

3. Now go type cars in the search bar.

4. Now, change the query of cars to cakes.

Note: Now when the user types cars in search bar, the will get results of cakes instead of cars, thus shows the session is hijacked.

Tool/Utility	Information Collected/Objective Achieved
Zed Attack Proxy	• SSL certificate to hack into a website • Redirecting the request made in search bar
